

[Information from Maruni Wood Industry / Roundish, Lightwood]

New addition to Maruni Collection 2011

“Roundish” with a striking back, and light and beautiful “Lightwood”

We have released the Maruni Collection in 2008.

This collaboration with Naoto Fukasawa aiming at producing furniture that will set a world standard, have been receiving great reviews from around the world. We are happy to announce that as of April 2011 Maruni Collection is now available in 20 countries. This year we are welcoming Jasper Morrison as our designer, and we will be announcing new products from both Fukasawa and Morrison.

Roundish by Naoto Fukasawa literally has a striking roundish curve in the back and seat. The view from the back is especially beautiful. The back is created with three different curvature. This exquisite curve in the back and seat lets the sitter fit comfortably as if the chair is wrapped around your body. This chair gives you a sense of ease as well as relaxation.

Jasper Morrison's Lightwood is also literally named for its lightweight feature- only 2.5 to 3kg.

It is suitable for variety of uses due to its different choice of the seat; fabric, leather, webbing and mesh. Its elegantly curved legs and the lightweight looking structure are some of the reasons for its sculpture-like beauty.

Both chairs made use of the masterful craftsmanship and the fineness of machine manufacturing that Maruni Wood Industry excels in. From this well-thought design and exquisite construction, we are sure that you will be able to feel its comfort, the strong durability which makes it long-lasting, the flavor that adds over time, and the fascination and possibility of these wooden furniture.
