

ASIAN BENCH / STOOL · BENCH

Although Asian in style, this subdued yet elegant bench can readily blend into Western-style spaces as well. The form, created by using horizontal/vertical lines for the wood boards and panels, and the use of rich colors characteristic of Asian furniture provide a natural ambiance that gives the bench a truly traditional appearance unchanged by the passing of time. The compact size with a depth of only 30 cm provides a simple design allowing the bench to be easily used as a side table as well as a bench. You can use this bench in a wide range of applications from home use to museums and hotels.

DESIGN

Photo by Nacása & Partners Inc.

NAOTO FUKASAWA , 2013 -

"The basic structure of the bench with its combination of square logs and plates enables it to also work as a display table or a shelf. The deep brown color, characteristic of traditional Asian furniture, will deepen over time. The designer aimed to create a standard but rare architectural model that in Asian style but also fits with Western style."

WARRANTY

We will guarantee the product for two years from the date of delivery of the product. For the content of quality assurance please see the "Warranty Policy" included in the product.

TECHNICAL INFORMATION

WOOD

The wood used in this product is obtained from oak trees in North America that are managed and felled in a planned manner. We can also manufacture furniture using certified wood upon request; however, please note that it may take several months to procure the necessary materials. For more details about certified wood, please refer to the [dedicated webpage](#).

VOC

The coating and glue used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

PURPOSE OF USE

Indoor
Maruni Wood Industry has established various test standards and designs for comfortable use. However, the use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.
