

## Club / ARM CHAIR

The gorgeous flowing design used in traditional styles was rearranged into graceful lines to provide an arm chair with a cozy shape. The luxurious seating comfort hugs your body and the inviting form ensures an abundantly relaxing sitting experience. Highly difficult woodworking techniques using three-dimensional machining technology were applied to create the beautiful curved lines of the wood frame running from the elbows to the back.

## DESIGN

### JASPER MORRISON , 2012

"I think it's interesting to look at traditional models like the Maruni Britannia Chair and to try to reinvent them as contemporary models. Design is fixed on making 'new looks', but a large majority of the furniture market is made up of reproductions of classic designs, probably because people feel more comfortable or they feel they are taking less risk by selecting 'antiques'. So our intention is to accept this common taste for the Classic look, but to give it a fresher look, keeping what's good from the past and refining the forms to make something more contemporary."

\*Britannia is one of the Classic furniture series made by Maruni Wood Industry.

## MATERIAL & FINISH

oak

NL-0  
whitish

## WARRANTY

We will guarantee the product for two years from the date of delivery of the product. For the content of quality assurance please see the "Warranty Policy" included in the product.

## TECHNICAL INFORMATION

### WOOD

The wood used in this product is obtained from oak trees in North America that are managed and felled in a planned manner. If required, we can manufacture furniture with the FSC® or PEFC™ certification. In that case, however, longer lead-time will be required to procure the wood.

### UPHOLSTERY

The back of the armsofa is made of multiple layers of various urethane foam types with different specific weights. The seat is made of a feather cushion combined with multiple layers of various urethane foam types with different specific weights. The seat part of the main body frame is equipped with elastic webbing in order to improve the cushioning quality and durability of the product.

### VOC

The coating, glue, plywood, and MDF used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

## FLAME RESISTANCE

The foam and materials of the product can be customized to meet the requirements of BS5852 Source 5 with a special order.

## PURPOSE OF USE

Indoor

Maruni Wood Industry has established various test standards and designs for comfortable use, however, use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.
