HIROSHIMA / FOLDING CHAIR

This folding chair not only provides excellent seating comfort but even maintains a beautiful form when folded up for storage. The back features beautiful wood grain running horizontally, making for an impressive contrast to the vertical-running wood grain of the round perfectly straight legs. The design of this extremely strong and durable wood folding chair is the result of a detailed structural study and application of advanced woodworking techniques. The thickness of only 13 cm when folded allows it to be stored in compact space and it is light enough to be easily carried with only one hand.

DESIGN

NAOTO FUKASAWA , 2013

" 'Why not add a folding chair to the HIROSHIMA series? A chair that creates a perfect image when it's placed against the wall,' the designer thought. A folding chair with a beautiful wood surface is a rare find, and is sure to attract furniture lovers."

TECHNICAL INFORMATION

WOOD

The wood used in this product is obtained from beech trees in Europe and oak trees in North America that are managed and felled in a planned manner. If required, we can manufacture furniture with the FSC® or PEFC[™] certification. In that case, however, longer lead-time will be required to procure the wood.

voc

The coating, glue, plywood, and MDF used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

PURPOSE OF USE

Indoor

Maruni Wood Industry has established various test standards and designs for comfortable use, however, use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.
