

## HIROSHIMA / LOUNGE CHAIR • OTTOMAN

This sleek lounge chair is notable for the lines connecting the arms and back. Looking as if it was carved out of solid wood, with beautiful gentle curves, this lounge chair provides exceptional fit with your back. The luxurious seating comfort is perfect for relaxing in living rooms and lounges. The comfortable seat, which never feels like you are touching the bottom, was achieved through careful attention to the seat structure to provide a sense of unity. The removable fabric cover allows you to match the season or interior design, and also makes for easy maintenance.

## DESIGN

NAOTO FUKASAWA , 2009

"All along, I had wanted to design good wooden chairs. I thought that good chairs would be ones that became permeated with a flavor of daily living as they were used over a long time. Like the plain-wooden chairs of Scandinavia for example, which by now have become a staple all over the world. Rather than 'design' as such, what they have is the glow of artistic handcrafting. Japanese wooden products have the same kind of artistic element, and the unfinished (no finish) ones especially – mainly made from cypress – give a sense of refined, immaculate, exalted purity. What I aimed for in this chair was a refined and pure aura that at the same time has human warmth."

## MATERIAL & FINISH

### beech

NL-0 whitish  
EC-1 mat black  
EA-1 mat white

### oak

C-0 clear  
NL-0 whitish  
NK-1 natural black  
OG-0 light gray

### walnut

C-0 clear  
WB-1 light brown

## WARRANTY

We will guarantee the product for two years from the date of delivery of the product. For the content of quality assurance please see the "Warranty Policy" included in the product.

## TESTS

ISO7173-L4 / Determination of strength and durability  
ISO7174 / Determination of stability

## TECHNICAL INFORMATION

### WOOD

The wood used in this product is obtained from beech trees in Europe and oak or walnut trees in North America that are managed and felled in a planned manner. If required, we can manufacture furniture with the FSC® or PEFC™ certification. In that case, however, longer lead-time will be required to procure the wood.

### UPHOLSTERY

The seat is made of a combination of molded plywood, suspension fabric, rubber sponge, and urethane foam.

### GLIDE

The leg tips can be equipped with polyethylene gliders, which are sold separately. You can choose between felt and plastic bottom parts.

### VOC

The coating, glue, plywood, and MDF used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

## FLAME RESISTANCE

The foam and materials of the product can be customized to meet the requirements of BS5852 Source 5 with a special order.

## PURPOSE OF USE

### Indoor

Maruni Wood Industry has established various test standards and designs for comfortable use, however, use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.
