

MALTA / TABLE [steel leg]

This simple table perfectly expresses the warmth, feel and texture of the wood. Your appreciation of this table will surely increase as you use it thanks to the natural appearance of its unique tabletop, which combines a variety of wooden panels characterized by different wood grains. The tabletop and black steel legs make for a beautiful contrast. The sharp elegant form allows it to be harmoniously combined with any types of chairs. We have created model variations that allow you to not only select the width but the depth as well.

* As solid wood with knots is used for the tabletop, there may be individual differences in the actual appearance of colors, wood grains and knots. The steel legs enable the use of only four legs for large sizes as well.

DESIGN

NAOTO FUKASAWA , 2015

"We received many requests for a large-sized table with a pure solid tabletop. Being over three meters in length, the tabletop required steel beams so that it would not become warped. In addition to the black beams, the table has steel legs with a diameter of 48.6 mm. The contrast of the pure wood and black Steel highlights the attractiveness of the sleek and solid tabletop. The same locations are never repeated for the attachment of the tabletop, and different colors and patterns are skillfully assembled so that no two tables are alike. You can select a table size to match your needs. We hope you thoroughly enjoy the rich unadorned feeling of the materials used."

WARRANTY

We will guarantee the product for two years from the date of delivery of the product. For the content of quality assurance please see the "Warranty Policy" included in the product.

TECHNICAL INFORMATION

WOOD

The wood used in this product is obtained from oak or walnut trees in North America that are managed and felled in a planned manner. If required, we can manufacture furniture with the FSC® or PEFC™ certification. In that case, however, longer lead-time will be required to procure the wood.

STEEL

The legs are made of steel with a melamine resin coated that gives the surface a matte black shade.

AJUSTER

The leg tips are equipped with adjusters. The bottom is made of polyurethane rubber.

VOC

The coating and glue used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

PURPOSE OF USE

Indoor

Maruni Wood Industry has established various test standards and designs for comfortable use, however, use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.

TABLE [Steel leg] 180, 200, 220, 240, 320
