

T&O / TABLE

Tables of the T&O Series definitely make a friendly impression. You can choose a veneer or solid wood tabletop. A varied lineup of sizes and shapes are provided in consideration of the wide variety of interior spaces. Please look for your desired size. Similar to the chairs, you can choose black, green or red for the color of the steel legs supporting the tabletop.

DESIGN

JASPER MORRISON , 2017

The familiar typology and the contrast of wood and painted steel are an excellent fit with both T&O family and other variations of chairs from the Maruni Collection.

WARRANTY

We will guarantee the product for two years from the date of delivery of the product. For the content of quality assurance please see the "Warranty Policy" included in the product.

TESTS

ISO21016-6.1.1 / Stability under vertical load

ISO21016-6.2 / Strength under vertical static force

ISO7172-6 / Stability with vertical and horizontal forces

ANSI BIFMA X5.5 / Stability

TECHNICAL INFORMATION

WOOD

The wood used in this product is obtained from maple, oak or ash trees in North America that are managed and felled in a planned manner. If required, we can manufacture furniture with the FSC® or PEFC™ certification. In that case, however, a longer lead-time will be required to procure the wood.

TABLETOP

You can choose the tabletop from wood veneer or solid wood(*). The wood veneer top is veneered on top of particleboard. The wood veneer top are 20 or 25 mm thick depending on the table size, and the solid wood top is 25 mm thick.* Solid wood tabletops are not available for certain dimensions.

METAL

The supporting rod and both upper and lower disk-shaped legs are made of steel. The lower surface layer of the disk-shaped leg on the ground is processed with the cationic electrodeposition coating method and then finished with the powder-coating method.

FLOOR PROTECTOR

The supporting rod and both upper and lower disk-shaped legs are made of steel. The lower surface layer of the disk-shaped leg on the ground is processed with the cationic electrodeposition coating method and then finished with the powder-coating method.

VOC

The coating, glue, and particleboard used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

PURPOSE OF USE

Indoor

Maruni Wood Industry has established various test standards and designs for comfortable use. However, the use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.
