

TRADITIONAL / SOFA • OTTOMAN

This is a traditional style sofa. With only simple adornments, this sofa features colors and knitted fabrics that can readily fit in with modern interiors. The smartly upholstered seat and slender elongated simple wood frame construction give this sofa its special character. The high-back style provides it with an impressive presence as well as complete support and comfort when sitting in it. This sofa combines classical elements together with a simple modern appearance.

DESIGN

NAOTO FUKASAWA , 2008

"Maruni Wood Industry has a long history of manufacturing traditional western style furniture, and many people today still have a fondness for the style. Therefore, we have included some tasteful traditional pieces into the modern Maruni Collection as an experiment. Although traditional furniture can look old-fashioned at first sight, it is true that such an "old-fashioned-ness" is also associated with our sense of comfort. Based on that, we slightly modified the materials and upholsteries of these traditional pieces."

WARRANTY

We will guarantee the product for two years from the date of delivery of the product. For the content of quality assurance please see the "Warranty Policy" included in the product.

TECHNICAL INFORMATION

WOOD

The wood used in this product is obtained from beech trees in Europe and oak trees in North America that are managed and felled in a planned manner. If required, we can manufacture furniture with the FSC® or PEFC™ certification. In that case, however, longer lead-time will be required to procure the wood.

UPHOLSTERY

The back and seat of the sofa are made of multiple layers of various urethane foam types with different specific weights. The seat base is equipped with elastic webbing in order to improve the cushioning quality and durability of the product.

VOC

The coating, glue, plywood, and MDF used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

FLAME RESISTANCE

The foam and materials of the product can be customized to meet the requirements of BS5852 Source 5 with a special order.

PURPOSE OF USE

Indoor

Maruni Wood Industry has established various test standards and designs for comfortable use, however, use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.
