

HIROSHIMA / WIDE ARMCHAIR

As if carved out of solid wood, this wide armchair features beautiful gentle curves from the armrests through the back. Slightly wider in size than the HIROSHIMA Armchair, this chair gives a more spacious and thus comfortable seating experience. The beautiful contrast between the light and shadow on the chair accentuates the charm of chair's form. This armchair offers not only a rich look and warmth of the natural wood, but also seating comfort and exquisite beauty.

We will guarantee the product for two years from the date of delivery of the product. For the content of quality assurance please see the "Warranty Policy" included in the product.

TESTS

ISO7173-L4 / Determination of strength and durability

ISO7174 / Determination of stability

TECHNICAL INFORMATION

WOOD

The wood used in this product is obtained from beech trees in Europe and oak or walnut trees in North America that are managed and felled in a planned manner. If required, we can manufacture furniture with the FSC® or PEFC™ certification. In that case, however, a longer lead-time will be required to procure the wood.

MOLDED PLYWOOD

The seat is made from molded plywood. The core consists of kapur and beech veneer layers.

UPHOLSTERY

The seat is made of a combination of molded plywood, suspension fabric, rubber sponge, and urethane foam. The fabric model has loose covers, and the leather model is upholstered.

VOC

The coating, glue and plywood used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

FLAME RESISTANCE

The foam and materials of the product can be customized to meet the requirements of BS5852 Source 5 with a special order.

PURPOSE OF USE

Indoor

MaruniWood Industry has established various test standards and designs for comfortable use. However, the use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.
