

HIROSHIMA / SOFA · CHAISE LONGUE · OTTOMAN · HEADREST

A truly simple sofa. The refined straight lines give the chair the impression of relaxed inviting comfort. At the same time, the slight curvature provided by the fabric and cushion creates a softness that blends perfectly into any setting. The superb structure, made of down and low-resistance urethane to support the body with just the right amount of give, smooth stitch work, and careful attention to other equally detailed features make for a wonderful sofa. You can choose from a combination of a single-side armrest-type, chaise longue and ottoman for a wide variety of sizes and shapes to fit your space perfectly. The removable fabric cover allows you to match the season or interior design, and also makes for easy maintenance.

DESIGN

NAOTO FUKASAWA , 2009 -

MATERIAL & FINISH

beech

WARRANTY

We will guarantee the product for two years from the date of delivery of the product. For the content of quality assurance please see the "Warranty Policy" included in the product.

TECHNICAL INFORMATION

WOOD

The wood used in this product is obtained from beech trees in Europe and ash, oak or walnut trees in North America that are managed and felled in a planned manner. If required, we can manufacture furniture with the FSC® or PEFC™ certification. In that case, however, a longer lead-time will be required to procure the wood.

UPHOLSTERY

The back cushion of the sofa is made of a feather cushion combined with multiple layers of various urethane foam types with different specific weights. The seat part of the main body frame is equipped with elastic webbing in order to improve the cushioning quality and durability of the product. There are two different versions available: a version with loose replaceable covers on the main body and cushions and an upholstered version where only the cushion covers can be replaced.

VOC

The coating, glue and plywood used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

FLAME RESISTANCE

The foam and materials of the product can be customized to meet the requirements of BS5852 Source 5 with a special order.

PURPOSE OF USE

Indoor

Maruni Wood Industry has established various test standards and designs for comfortable use. However, the use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.
